OUR STORY

EVERY DETAIL, MADE TO ORDER IN CAMPBELLSVILLE, KENTUCKY.

Cox Interior began in 1983 as a small Kentucky woodworking company and has grown into one of the region's most trusted premium millwork manufacturers. For over four decades we've combined craftsmanship, technology and team-work to deliver beautiful, durable products that transform every space — from our sawmill to your job site, every piece reflects the pride, precision and purpose of a company built on quality.

We've grown, but our values haven't changed. Every board we cut and every door we build reflects the honesty, reliabil-ity and craftsmanship that define the Kentucky work ethic. Our products don't just fill homes — they build them.

THE COX DIFFERENCE

FROM THE FOREST...

Cox Interior has been sawing Kentucky hardwood since 1983. What started as a regional sawmill has grown into a single, 144-acre campus in Campbellsville — sawmill, energy-recovery kilns, milling lines and door assembly all under one roof.
Owning every step means we answer for the result: control, steady lead times, and quality that holds lot after lot.

MILLED IN KENTUCKY

Approximately 100,000 board feet of lumber sawn each week, sold in truckload quantities.

KILN DRIED ON-SITE

100,000 board feet dried per day, with precision sticking placement and control monitoring.

OWNED & OPERATED FLEET

A large team of drivers to ensure timely delivery of your order.

KENTUCKY BORN.
AMERICAN MADE.

...TO THE FAMILY ROOM

Cox Interior is a one-stop shop for interior finished wood products — the details homeowners notice, and the ones that set a home apart from the competition. When we fulfil an order, it isn't just our reputation on the line. It's yours too.

A PARTNER, NOT JUST A SUPPLIER

Builders and designers return to Cox Interior because we think like a partner. We archive your approved profiles so model-home details repeat cleanly across every phase, stage bundles by room and elevation for faster installs, and keep communication flowing before, during and after each delivery — fewer surprises, cleaner job sites, and specs that stay true from the first lot to the last.

SCAN FOR OUR FULL PRODUCT CATALOG

THE CRAFTSMEN

Our craftsmen are the heart of Cox Interior. Every moulding profile, door panel and stair part reflects decades of combined experience in woodworking and mill design. From traditional joinery to modern CNC precision, our workshop blends art and technology — and every piece is inspected for fit, finish and durability before it leaves the facility.

Knife grinders, kiln technicians and quality-control leads take personal ownership of every order — and many of our leaders started on the floor, so deep know-how runs through every level of the company.

SUSTAINABLE CRAFTSMANSHIP

ON-SITE COGENERATION — POWERED BY OUR OWN WOOD WASTE

Our campus includes its own cogeneration facility, generating the electricity and steam that power our kilns. The boiler is fueled entirely by wood waste recovered from our manufacturing operations — a closed-loop energy cycle that gives Cox Interior a zero-carbon-footprint production process.

KENTUCKY PROUD

Hardwoods harvested, kiln-dried and processed locally — sustainable, quality-controlled and built to last in Southern climates.

RESPONSIBLE FORESTRY

We work with responsible lumber suppliers and regional forestry programs — materials that contribute to green building standards.

SMARTER LOGISTICS

Direct manufacture-to-site delivery means fewer miles, faster arrival and less carbon impact.

A PARTNER, NOT JUST A SUPPLIER

Builders and designers return to Cox Interior because we think like a partner. We archive your approved profiles so model-home details repeat cleanly across every phase, deliver direct to site for faster installs, and keep communication flowing before, during and after each delivery — fewer surprises, cleaner job sites, and specs that stay true from the first lot to the last.

MARKETS WE SERVE

Our reach goes far beyond Kentucky. With a dedicated logistics fleet, Cox Interior serves builders, architects, designers and homeowners across the South and Midwest — and each regional service area has its own project management team for personalized service and local expertise.

REGIONAL EXPERTISE, NATIONAL DELIVERY

With our own trucking fleet, Cox Interior delivers finished millwork to job sites anywhere in the continental United States — including active projects in New York City and South Florida right now.

02 · CUSTOM CAPABILITIES

IF YOU CAN DRAW IT, WE CAN BUILD IT

Architects and designers rarely ask what a millwork company makes — they ask what it can make for them and their client. At Cox Interior, the answer is almost anything. Bring us a drawing, a photograph of a 1920s cornice, a profile lifted from an existing wall, or an idea sketched on a napkin, and our in-house knife room grinds a custom cutter to match it — to the thousandth of an inch.

Custom isn't a side offering here — it's the whole shop. Because we own every step from standing log to job-site delivery, we can produce the one-of-a-kind detail that sets a project apart, and that most competitors can't, or won't, take on.

Every profile we have ever cut is archived, so a detail approved on one project can be reproduced exactly years later — or scaled across an entire development without drift.

WHY WE CAN — ONE CAMPUS, EVERY STEP

Own Sawmill · Knife Room · Energy-Recovery Kilns · Milling & Assembly · Own Delivery Fleet

WHAT WE CAN CUSTOMIZE

DOORS WITHOUT LIMITS

Any size, any thickness, any species — flat panel, raised panel, flush, French, or divided lite.

ONE-OF-A-KIND MANTELS

From a simple shelf mantel to a full fireplace surround, built to your drawing.

CUSTOM CABINET DOORS

Five-piece hardwood or refined MDF, matched to the room's doors and millwork.

STAIRS & ARCHITECTURAL FEATURES

Custom-turned newels, balusters and columns, curved and radius work.

WAINSCOTING & PANEL WALLS

Raised-panel wall units engineered to your wall dimensions, delivered ready to install.

MATCH ANYTHING

Hand us an existing profile, species or detail and we'll make the new disappear into the old.

03 · WOOD INTERIOR DOORS

SEVENTEEN STYLES, ANY SIZE, ANY SPECIES

Most interior doors used to come in a handful of styles — four-panel, six-panel, and little else. Cox Interior builds wood interior doors of any size and thickness, made to order in your choice of wood species.

EVERY CONFIGURATION

Flat panel, raised panel, flush, French, louvered and divided lite — seventeen door styles and four transom patterns, all built to the opening rather than a standard size.

BUILT TO ORDER

ANY SIZE & THICKNESS

Built to your opening — no standard-size limitations.

MADE TO ORDER

Every door is manufactured to the individual order, in Campbellsville, Kentucky.

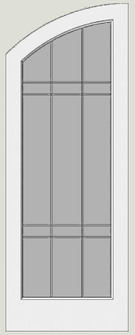

PRECISION IN EVERY DETAIL — FROM DOOR TO STAIR TO MANTEL.

Cox Interior maintains a library of more than 9,000 knife profiles. For contractors and architects working on projects that call for something outside a standard catalog, that library is where the search begins and usually ends.

Historical profiles pulled from older homes. Custom casing details drawn by an architect. Discontinued runs a client is trying to match across an addition or renovation. Specialty moulding combinations that no national distributor carries. These are the requests that stop most suppliers — and the ones our profile library is built to answer.

If the profile exists anywhere in residential millwork, there's a strong chance it's already in our system and ready to run. If it's genuinely new — a custom profile drawn from scratch for a specific project — we can cut it. Either way, the search for the right profile doesn't have to become a lead time problem or a reason to compromise on what the design actually called for. The profile library exists so that the answer to "can you get this?" is almost always yes.

OUR PROCESS

HOW YOUR CUSTOM DOOR IS MADE

Ever wonder what actually goes into a custom door built specifically for your home? Here's a look behind the scenes at Cox Interior.

01 DESIGN & SHOP DRAWINGS

It starts with detailed shop drawings. Once we calculate the exact sizes for your panels, stiles and rails, we check our inventory.

02 ROUGH MILL

If raw materials aren't stocked and ready to go, it hits our rough mill — planed, ripped, chopped and prepped to perfection.

03 MOLDING & MACHINING

From there, everything moves to the door department, where every edge and profile is machined to your exact specs.

04 ASSEMBLY

Components are fit together with high-strength wood glue and threaded dowels, then set in a hydraulic press under heavy pressure while the adhesive cures.

05 SANDING & INSPECTION

The door passes through an industrial belt sander, followed by detailed hand-sanding for an ultra-smooth finish, then one last quality inspection.

06 PACKAGING & DELIVERY

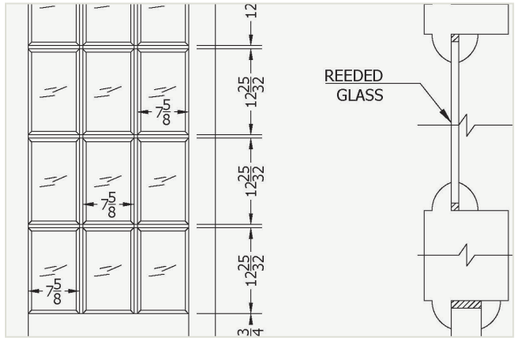

Packaged carefully and delivered directly to your job site.

Need custom trim or decorative molding? Our molder department crafts that right in-house.

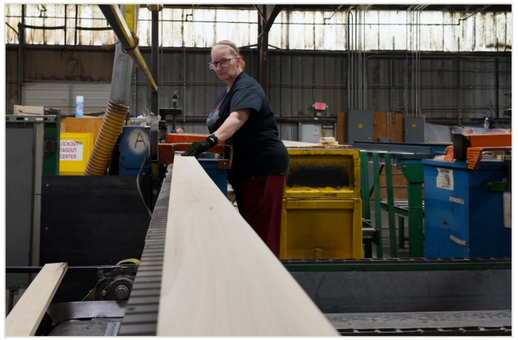

Have a vision for your home's doors? Contact your Cox Interior sales representative to get started.

THE FULL MOLDED-DOOR LINE — THREE COLLECTIONS

In addition to wood and MDF interior doors, Cox Interior offers a full line of popular molded Masonite® doors, available in three designer collections to suit different homes and customers. Many are available with Masonite's sound-dampening Safe 'N Sound® solid core option, as well as the eco-friendly Emerald® "green" specification.

EXPO
Sleek and artistic for a contemporary feel — Euro-style raised panel, Shaker styles and space-saving sliding track doors.

SELECT
Architectural details deliver the authentic look of stile-and-rail wood doors — 5-panel, 2-panel camber top and 1-panel plank styles.

CLASSICS
Elegant style for a traditional look, with a variety of molded panel patterns — smooth, Roman, arch top and more.

ALSO AVAILABLE

Flush Series — durable, low-maintenance and cost-effective, available in woodgrain and pre-primed styles. Commercial — durable doors with taller bottom rails and wider stiles for compatibility with commercial hardware.

STOCK & CUSTOM-RUN PROFILES

Cox Interior manufactures a complete range of moldings and millwork for the interior and exterior of the home — from stock profiles that ship immediately to custom-run, non-stock patterns milled to order. Every profile is milled in Campbellsville, Kentucky.

NON-STOCK, MILLED TO ORDER

Beyond the stock line, Cox Interior can produce virtually any custom molding style — corner bead, crown apron, chair rail backer, T-astragal and dozens more — ground and milled to match a drawing, a sample, or an existing detail already in the home.

TWENTY-EIGHT PROFILES, TWO WAYS

STOCK

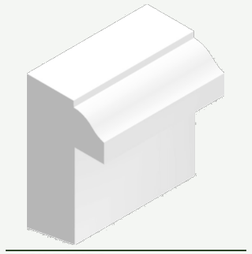

Ships immediately from Campbellsville — back bands, base, casing, chair rail, crown, dentil, window and more, in standard dimension ranges.

CUSTOM-RUN

Milled to order for a specific project or match — the same knife-room precision used across every product in this book.

07 · CABINET DOORS

MADE TO YOUR EXACT DIMENSIONS

Discerning homeowners and builders understand that cabinet doors are just as important as room doors when it comes to enhancing a home. Whether the project is kitchen, bathroom, laundry or storage, Cox Interior crafts custom cabinet doors in MDF and hardwood.

SIZE PARAMETERS

One-panel doors up to 28″ wide × 36″ high (doors ordered beyond these dimensions carry no warranty) · wood doors built ¾″ thick in five-piece stile and rail construction · every door made to your exact dimensions.

MDF VS. HARDWOOD

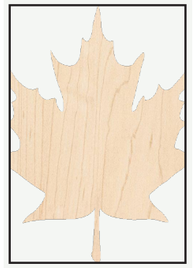

MDF CABINET DOORS

Minimal shrinking, no grain, and easy to shape into virtually any style.

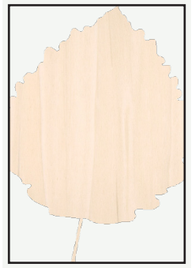

WOOD CABINET DOORS

Five-piece stile and rail construction, ¾″ thick, hardwood panels throughout, matched to the room's doors and millwork so the whole space reads as one language.

MDF CABINET DOORS

MDF cabinet doors have become the new standard for many homeowners and builders. Typically less expensive than hardwood, they are as substantial as a solid wood door — constructed of super-refined MDF for remarkable stability. Doors come pre-sanded, can be primed on all sides with a high-build primer, and pair perfectly with Cox MDF interior doors in the same style.

MINIMAL SHRINKING

Each door face is constructed from one piece.

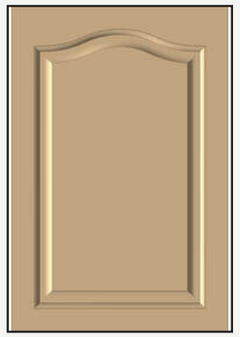

SMOOTHER SURFACE

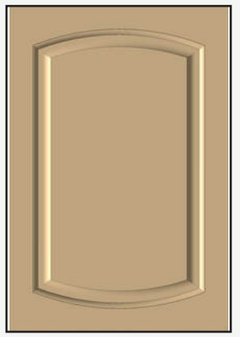

No grain — especially important for painted cabinets.

FIREPLACE SURROUNDS & SHELF MANTELS

MADE TO ORDER

The fireplace has always been one of the centerpieces of a home. Cox Interior's finely crafted mantels add the finishing touch to any fireplace, in a style that matches the home — from basic shelf mantels to complete fireplace surrounds.

Every mantel is made to order to your specifications, in your choice of quality woods — from a simple shelf mantel to a full fireplace surround, built to your drawing.

09 · STAIR PARTS

THE COMPLETE STAIR CATALOG

BALUSTERS TO TREADS

Stairs aren't just functional anymore — a beautiful staircase can be the centerpiece of a home's interior. Cox Interior offers complete wood stair systems and a huge selection of wood stair parts, available in most woods, including the popular Red Oak and Poplar.

Custom-milled posts, balusters and columns are also available to meet a project's precise needs.

KENDRA CICHANSKI

HEAD OF SALES · COX INTERIOR

Kendra Cichanski leads sales at Cox Interior, overseeing sales strategy, revenue growth and market expansion with nearly 50 sales representatives across 10 U.S. territories. She is the first point of contact for builders, architects, designers and dealer partners looking to put Cox craftsmanship to work on their projects.

She brings nearly two decades of senior sales leadership spanning custom millwork, cabinetry, interiors and the multifamily sector, building and scaling high-performing sales teams across multiple markets nationwide. Kendra began her career as an interior designer, giving her firsthand insight into client needs and the environments they create — a blend of design fluency and executive sales leadership that means she understands both the design intent and the installation realities of every project she touches.

> “Cox has a legacy of craftsmanship and a reputation built on quality — strengths that truly matter in today’s market. My focus is building on that foundation, strengthening our go-to-market strategy, and elevating how we show up to customers, designers, and industry partners.”
